To The Federal Communications Commission: XM Satellite Radio is a tremendous value that I have come to not only enjoy but rely upon in my travels throughout the U.S. The local traffic info is helpful but the local weather updates are invaluable. My family and I greatly benefit from the traffic and weather reports that XM supplies. It is disturbing that the National Association of Broadcasters is attempting the stop XM from providing a valuable service that I want to continue to receive. Competition is healthy and the NAB should not attempt to thwart it but should find ways to participate in it. I subscribe to XM because I want it ? I choose to receive it. What I do not want is the NAB dictating what I should be able to receive or listen to whenever I want to. I wish to go on record as saying I vehemently oppose NAB petition 04-160 and any other attempt to infringe on my personal choices. I will also be contacting fellow Mississippian Charles Pickering (R-MS) to share my sentiments with him as I understand he introduced legislation (HR 4026) which assists the NAB's attempt to restrict my freedom to listen to XM provided locally oriented content. As we recently celebrated Memorial Day I am reminded why so many died and continue to serve ? so I would have freedom to, among other things, listen to what I want. Please do not let the political influence of the NAB's lobbyist interfere with our freedoms. Thank you for reading my opinions and request. Wanda Jacobs.
